February 2025

STRICTLY CONFIDENTIAL

This Memorandum is furnished on a confidential basis to a limited number of accredited investors solely for their consideration of a possible investment in Helix Ventures Fund III, L.P.

1. FIRM OVERVIEW

Helix Ventures Management, L.P. (“Helix” or the “Firm”) is an early-stage venture capital firm founded in 2017 and headquartered in San Francisco, California. The Firm manages approximately \$650 million across two predecessor funds (Fund I, vintage 2017, and Fund II, vintage 2021) and invests in seed and Series A-stage technology companies building enterprise software, artificial intelligence infrastructure, and developer productivity tools.

Helix is led by Founding Partners **Priya Raman** and **Marcus Chen**, both former early-stage operators and investors with over 15 years of combined experience at category-leading enterprise software companies. The investment team comprises four full-time investors supported by a dedicated platform team focused on talent, go-to-market, and technical due diligence.

2. PRIOR FUND PERFORMANCE

The table below sets forth the summary performance of Helix's predecessor funds as of June 30, 2024. Past performance is not indicative of future results.

Fund	Vintage	Fund Size	DPI	RVPI	TVPI	Net IRR
Helix Ventures Fund I, L.P.	2017	\$150M	1.18x	1.72x	2.90x	22.4%
Helix Ventures Fund II, L.P.	2021	\$500M	0.04x	1.41x	1.45x	14.8%

Note: Fund II performance reflects early-stage portfolio maturation. Realized exits to date include the 2023 acquisition of Stratus Data by Oracle (\$2.1B) and the 2024 IPO of Nimbus Infrastructure on Nasdaq.

3. FUND III INVESTMENT STRATEGY

Focus Areas

Fund III will invest in approximately **25 — 30 portfolio companies** at the seed and Series A stages, with an average initial check size of \$4 million and reserves allocated for follow-on participation through Series B. The Fund will focus on the following investment themes:

AI Infrastructure. Foundation model tooling, inference optimization, data labeling platforms, and vector databases.

Developer Productivity. AI-augmented development environments, code intelligence, and engineering workflow automation.

Vertical SaaS with AI. Industry-specific applications that leverage AI as a core architectural primitive rather than a surface feature.

Enterprise Automation. Agent-based workflow systems and operational automation for mid-market and enterprise organizations.

Portfolio Construction

Metric	Target
Number of Investments	25 — 30
Initial Check Size	\$2M — \$8M
Maximum Exposure per Company	10% of aggregate Capital Commitments
Reserve Ratio	1.25x — 1.5x of initial check
Ownership Target at First Check	10% — 20%
Lead Investments	50% — 70% of deployed capital

5. SERVICE PROVIDERS

Role	Provider
Fund Administrator	Standish Management
Independent Auditor	Deloitte & Touche LLP
Legal Counsel	Cooley LLP
Tax Advisor	Deloitte Tax LLP
Depository	First Republic Bank

6. CERTAIN RISK FACTORS

An investment in the Fund involves significant risk, including the potential for loss of the entire amount invested. Prospective investors should carefully consider, among other things:

- Early-stage venture investments are highly illiquid and may require many years to realize returns.
- A substantial percentage of portfolio companies may fail or return limited value.
- Past performance of predecessor funds is not indicative of Fund III results.
- Concentration in AI and enterprise software exposes the Fund to thematic and sector-specific risks.
- The Fund's success depends on the continued active involvement of the Key Persons.

This summary is qualified in its entirety by the definitive Limited Partnership Agreement of the Fund, which shall govern the rights and obligations of all Partners.
